Tasks of a CMDS Administrator

CMDS administrators are required to perform the following tasks in the system:

Add new personnel to the system

- Add new users, including the correct email address, to the required department within the organization, as approved.
- Assign the new user a manager/supervisor and validator.
- Assign the new user the required profile(s).
- Assign the new user any required training (COPs, SOPs, etc.)
- Send the new user their 'Welcome Email'.

Run reports

CMDS offers several reports. Administrators should be familiar with the CMDS reports available, as well as how to export them from the system.

Notify CMDS Admin of users to archive

When personnel leave your organization, please notify "CMDS Administration" (admin_cmds@keyera.com) to ensure you are not billed for those individuals at invoice time.

Manage training

- CMDS tracks Time Sensitive Safety Certificates (TSSCs), as well as other organization specific training – TSSCs must be entered by an administrator, including the completion date and copies of the tickets, where required.
- Organizations may enter COP/SOPs into CMDS. In these cases, administrators must scan or link the documents to CMDS and ensure they remain current.
- If training is assigned to users as a requirement, administrators are responsible for managing it in coordination with supervisors/leads.

Managing personnel

- Within an organization, users may move departments, receive promotions, or change managers/supervisors/validators. These changes will need to be made in CMDS as well.
- Users will often have questions regarding the use of the system, login, their required tasks, etc. Administrators are responsible for fielding these inquiries. If you are unable to answer a user's question, contact "CMDS Administration". Please do not have the user contact "CMDS Administration" directly.

Set up and manage system notifications

Working with “CMDS Administration” you will setup and manage system notifications. Notifications are highly customizable depending on the organization’s preferences, administrators need to know:

- What notifications personnel are required to receive
- Who should be cc’d on the notifications
- If anyone is exempt from notifications
- As personnel change, the notification settings need to be updated as well

Train other CMDS admins

Depending on your role, you may be required to train other CMDS admins.

Know your key contacts

- For detailed profile content questions or items that extend beyond system use please contact your account manager.
- For system support/questions: admin_cmds@keyera.com
- NOTE: “CMDS Administration” requires one point of contact. All organization admins must go through one point of contact.

Adding New Users to CMDS

- Click on **“People”** under ‘System’ on the side menu.
- Expand **“Criteria”** and search for the name of the user you would like to add.
- If the user is not in the system already, click **“Add New Person”**.
- Enter their information – first name, last name, and email are mandatory fields.
- Click the **“Organization and Department”** tab. Use the dropdowns to select the user’s organization and department and select the appropriate radio button:
 - Select **“is employed by this department”** if the user is a worker in that department.
 - Select **“is employed by this organization”** if the user needs access to the organization / department but should not show up on reports (e.g., an administrator that needs access to multiple departments but should not show up on the reports).
 - Select **“has access to the data for this organization/department”** for individuals not employed with the organization (e.g., external validator).
- Click **“Save”**.
 - NOTE: a notification will display when the name entered is similar to an existing user. Click **“Yes – Add New User”** if the user is new. If the person you are trying to enter already exists in the system, **STOP** and contact admin_cmds@keyera.com
- Click the **‘Login’** tab and change the status to **“Approved”**, then select the appropriate **Roles** for the user.
 - NOTE: Everyone should be assigned to the **“CMDS Worker”**
- Click the **‘Details’** tab and select **“Enable email notification for this person”**.
- Click **“Save”**.

Organization and Department

Organization *

Department *

This person

☒ is employed by this department

☐ is employed by this organization

☐ has access to the data for this organization/department

Click on each tab to enter the appropriate information following the steps below:

- Click the **‘Primary Profiles’** tab to assign the user a profile.
- Click **“Assign a primary profile”**.
- Select the **‘Department’** and **‘Profile’** you would like to assign them. For primary profiles, choose “Primary” in the **‘Type’** drop down.
 - NOTE: Primary profiles match the job the user is currently doing most of their time.
- ‘Status’ can be left blank. If you would like the profile to show in the user’s Training Plan, choose **“In Training”**
- Click **“Assign Profile”**
- Secondary Profiles can be assigned using the same steps, choosing **“Secondary”** in the Type drop down.
- To return to the user editor screen, click **“Edit User”**

Assign New Profile

Select the profile you want to acquire from the dropdown list and then click the Assign Profile button.

Department *

Type *

Profile *

Status

Compliance ☐ Yes, this profile requires compliance

Edit User

- Click the **'Reporting Lines'** tab to assign the appropriate manager(s) / supervisor(s) / validator(s).
- Use the dropdown to select a **'Person'**, indicate their **'Relationship'** to the user, then click **"Assign."**
- Click **"Save"**.
- For the user to access the system, **you must send them their login information.**
 - Click the **'Person'** tab and ensure the **"Enable email notification for this person"** box is selected
 - Click **"Send Welcome Email"**, a new page will pop up with the automated email generated. You can add content to the email or additional recipients.
 - Click **"Send"**.

Assign reporting line
Select a person from the list, indicate their relationship to Aaron, then click Assign

Person *

Relationship

☐ Leader

☒ Manager

☐ Supervisor

☐ Validator

Modifying Profiles Assigned to Users:

- Click on **"People"** under 'System' on the side menu.
- Expand **'Criteria'** and search for the user whose profile(s) you would like to modify.
- Once you locate the user on the list, click **"Profiles"** to the right of their name.
- Click the **"Organization Profiles"** tab. Here you can **remove profiles** assigned to the user by clicking the **garbage can icon** to the right of the profile.
 - NOTE: The user will not lose their competency history when the profile is deleted.
- Add profiles by clicking the **"Assign New Profile"** tab.
- Select the Department, Profile and Type from the dropdown menus.
 - If the user already has a Primary Profile and you would like to assign them a different one, remove the existing primary profile first.
 - A secondary profile can be required for compliance OR not required for compliance by checking the box **"Yes, this profile requires compliance"**.
 - Profiles assigned for training and development are generally not required for compliance, profiles assigned as mandatory (e.g., ICS roles) are required for compliance.
- Click **"Assign Profile"**.
 - *You can add several secondary profiles if needed.*
 - *Once you select "Assign Profile" the profile is added to the individual and saved.*

Additional Information:

- Yellow exclamation signs next to a user's name indicate the user **has not been assigned a primary profile**.
- **Confirm** a user is **"Approved"** before sending the Welcome Email.
- The system requires a **unique and valid email address for all users**.
- A user can have **more than one Secondary Profile** but can **only have one Primary Profile**, that primary profile should represent the job they are currently performing.

Assigning Organization-Specific Training to Individuals

To be completed **after** you have loaded your organization specific documents/links in the system.

- Login to CMDS.
- Click on **"Tools"** under 'System' on the side menu.
- Scroll down, under 'Bulk Update', click **"Assign Education & Training to Learners"**.
- Select an **'Achievement Type'** using the dropdown (Example: SOP's, COP's)
 - For assigning CMDS eLearning modules, change the 'Visibility' drop down to **"All Achievements"** to see the full list of available eLearnings.

Achievement Type * Visibility *

Modules All Achievements

Achievements

☐ M: 01 FPHO CMDS eLearning Online Course Overview ☐ M: ICS Rover

☐ M: 02 Applied Mathematics ☐ M: ICS Safety

- Select a **"Category"** to help filter the achievements (this can be left blank).
- Select the achievements you would like to assign by **checking the box** beside them.
- Under Learners, select the **Department** for which you would like to assign the achievement. Check the box for the type of employment, if needed, to find your selected users.
- You can choose to make the achievement **Time-Sensitive** by **checking the box and typing an interval of months**.
- Check the boxes for **"Training Plan"** and **"Required"** if the achievements you are assigning are mandatory.
- Select the individuals you would like to assign the resources to by **checking the box** next to their name.

- Once you have **checked the individuals** you would like to receive the selected achievement(s), click **“Save”**.

If the boxes **“Training Plan”** and **“Required”** were checked, the individual(s) will receive the assigned resource to their **Training Plan** and will be required to **“Sign Off”** on the achievement once they have **reviewed the associated material**.

Entering Time Sensitive Safety Certificates (Individual)

- Login to CMDS.
- Click on **“People”** under ‘System’ on the side menu.
- Expand **‘Criteria’** and search for the individual you would like to enter the Time Sensitive Safety Certificate(s) for.
- Once you have located the person, click **“Education”** to the right of their name.
- Check if the user already has the Time Sensitive Safety Certificate assigned to them. Click the **achievement name** if they do. If they do not have the Time Sensitive Safety Certificate, click **“Add New”**.
 - NOTE: if the achievement is already assigned, please proceed to the next section of this document.
- Using the drop downs, select **“Time Sensitive Safety Certificates”** under ‘Type’.
- Determine whether you want this certificate to show up in the user’s **“Training Plan”** and whether it is **“Required”**.
 - NOTE: Generally, if the certificate is **required** you should **check the Training Plan box** as well.
- Choose the name of the certification from the **“Achievement”** drop down.
- Use the radio buttons to indicate whether the certificate is **“Time Sensitive”**.
- If **“Yes”**, enter the **months** the certificate is valid for.
- If the certificate is complete, change the status to **“Valid”** and enter a completed date.
- If the certificate is not complete, enter it as **“Pending”**.
- Click **“Save”**
- You can **upload a copy of the certificate** under ‘Files’ by clicking **“Upload File”**.
- Click **“Save”**.

The screenshot shows a web form titled 'CMDS Information'. It contains several sections: 'CMDS Information' with checkboxes for 'Training Plan' and 'Required', both of which are checked; 'Admin Use Only' with a 'Type' dropdown set to 'Time-Sensitive Safety Certificates'; 'Achievement' with a dropdown set to 'TSSC: 200-01 Bulk Trk Propane Delivery (Inuvik) 3 Yrs (TEST)'; 'Assigned' with a date field set to 'Dec 20, 2024'; 'Completed' with an empty date field; 'Status' with a dropdown set to 'Pending'; and 'Time-Sensitive' with radio buttons for 'Yes' and 'No', where 'No' is selected. At the bottom, there is a 'Files' section with an 'Upload File' button. Below the form, there is a row of buttons: 'Save' (green), 'Delete' (red), 'New' (blue), 'View Change History' (grey), and a circular icon with a 'C'.

Updating an Existing Time Sensitive Safety Certificate:

- Click on **“People”** under ‘System’ on the side menu.
- Expand **‘Criteria’** and search to locate the individual you would like to enter the Time Sensitive Safety Certificate(s) for.
- Once you have located the person in the system, click **“Education”** to the right of their name.
- Scroll to find the certificate you would like to update.
- Click on the name of the certificate (e.g., First Aid).
- Update the date to reflect the new information and change the status to **“Valid”**.
- You can choose to **upload a copy of the certificate** under ‘Files’ by clicking **“Upload File”**.
 - You may also choose to remove the expired safety ticket. Ensure you save a copy in a secure location if needed for the future.
- Click **“Save”**.

Uploading Organization Specific Documents

When uploading organization specific documents to CMDS, there are two available methods:

1. Upload a file (recommended PDF file type).
2. Upload a link.

*NOTE: It is recommended you begin by **converting the document to a PDF** and saving it somewhere you will be able to easily locate it.*

Uploading a File:

- Scroll down to your ‘Learning Portal’
- Under ‘Achievements’, click **“Upload Files & Links”**.
- Under **“Upload a File”**, click the **magnifying glass** to locate and select the document you would like to upload.
- Select the **‘Type’** of achievement from the drop down (e.g., Additional Compliance Requirements)
- **‘Category’** is optional and can be used to help organize the documents as seen in the examples below.
- Under **‘Achievement’**, select the name from previously used achievement names OR click the keyboard to the right and type in the name.
 - NOTE: When typing in the achievement name, you do not need to include the prefix, the system will add that automatically. This will also create a NEW achievement if you type the name.
- You can then add a competency number (**optional**), this will result in the achievement showing up at the competency level during a self-assessment.
- To add a ‘Competency’, click on the drop down.
- In the **“Keyword”** box, type in the competency number and click **“Filter”**.

- Click the “+” to the right to add multiple competencies.
- Click **“Submit”**.

NOTE: You can load more than one file under a single achievement; however, it is important to keep in mind that this will result in one “Sign Off” per multiple documents.

*Example of one file per resource, resulting in a **“Sign Off” for each file:***

Other Category	CATEGORY
2022 Jan Testing	Other Category TYPE
ACR	Additional Compliance Requirements
ACHIEVEMENT	2195-17 Testing
	• 2195-17-Working Alone Complete-Nordegg.pdf
	FILE NAME

*Example of multiple files per resource, resulting in **one “Sign Off” for the multiple documents:***

Other Category	CATEGORY
2022 Jan Testing	2022 Jan Testing
ACR	Codes of Practices TYPE
August 2021	testing ACHIEVEMENT
	• Cert for Phising.pdf
	• KPL-03-Corrosion-Control.pdf
	• Test
	• Testing FILE NAMES

Uploading a Link:

- Scroll down to your ‘Learning Portal’.
- Under ‘Achievements’, click **“Upload Files & Links”**.
- Click **“Upload a Link”** near the top.
- Paste the URL you want to link to into the **“URL”** box.
- Give the achievement a **“Title”**.
- Select the **“Type”** of achievement from the drop down (e.g., Additional Compliance Requirements).
- **‘Category’** is optional and can be used to help organize the documents as seen in the examples above.
- Under **‘Achievement’**, select the name from previously used achievement names OR click the keyboard to the right and type in the name.
 - NOTE: When typing in a new achievement name, you do not need to include the prefix, the system will add that automatically.

- You can then add a competency number (**optional**), this will result in the resource showing up at the competency level during a self-assessment.
- To add a 'Competency', click on the drop down.
- In the **"Keyword"** box, type in the competency number and click **"Filter"**.
- Click the **"+"** to the right to add multiple competencies.
- Click **"Submit"**.

NOTE: You can load more than one link under a single achievement; however, it is important to keep in mind that this will result in one "Sign Off" per multiple documents (example above).

Adding a New Time Sensitive Safety Certificate (TSSC) Title:

Please contact your account manager or "CMDS Administration" (admin_cmds@keyera.com) and we will create it for you.

Updating Organization Specific Documents

There are two ways to update organization specific achievements:

Option #1

- Scroll down to your 'Learning Portal' and click **"Upload Files & Links"**.
- Upload the new file.
 - **IMPORTANT: The file name must be exactly the same as the existing file name to successfully override.**
- Ensure the box beside **"Overwrite this file if it already exists"** is checked off.
 - NOTE: Replacing a document will not require users to re-sign off. If you would like users to have to re-sign off on the document, please **"Bulk Expire"** the achievement after it has been updated.
- Continue to populate the drop downs to match the existing file location.
- Click **"Submit"**.
 - We recommend you refresh your browser, then check the document to make sure it is successfully replaced.

Option #2

- Under 'Libraries' on the side bar, click **"Achievements"**.
- Expand **"Criteria"** and search for the achievement you would like to update.
- Click on the **"Title"** and click **"Upload"** under 'Downloads'.
- From this screen, you can choose to upload a file, a new link, and/or remove any of the existing attachments by clicking the garbage can(s) to the right of the attachment.
 - We recommend you refresh your browser then check the document to make sure it is successfully replaced.

Notes to Consider

- You must use **'Option 2'** to update organization-specific links as you need to delete the old link and upload the new link. You are unable to override links as you can for files using 'Option 1'.
- If you are having issues uploading or updating files and / or links, please reach out to your account manager or "CMDS Administration" (admin_cmds@keyera.com).

CMDS Reports

- Login to CMDS.
- Click **"Reports"** under 'System' on the side menu.
- Here you will see the CMDS reports available.
- For detailed report guidance, please contact your administrator or account manager.

Tips to help navigate, generate, and export available CMDS reports:

- To select the report criteria, click the applicable dropdowns, check the boxes, and click **"OK"** or **click outside of the dropdown** once you select the information.
- The check box at the very top of the criteria list can be used to select/deselect all options.
- Use the 'Departments' drop down to select the department(s) you would like to report on. Radio buttons will appear when you can select only **one department**, and check boxes will allow you to select **up to 10 departments**.
- Use the 'Employees' drop down to either leave "All Employees" or choose an employee(s) to run the report on.
- When running the report on profiles, choose whether you would like the report to be generated on only the **"Only primary profiles"**, **"Profiles that require compliance"**, or **"All profiles"**.
- Click **"Report"** on the bottom left.
- To **export** the report from the system, click **"Download XLSX"** for Excel or **"Download PDF"**.

Companies interested in setting up an API (application programming interface) should contact admin_cmds@keyera.com. Please note that there is an additional one-time fee for the API.

Programs

Creating a New Program

From your CMDS home page:

- Click **“Tools”** under ‘System’ on the side menu.
- Under ‘Libraries (Field Admins)’ click **“Programs”**.
- Click **“Add New Program”**.
- Under ‘Program Name’, **type in the name**.
- Select the department from the drop down.
- OPTIONAL: type in a template description.
- Ensure the box is checked for **“Achievements Only”**.
- Click **“Next”**.
- Select the achievements you would like to add by **checking the boxes**. You can search for or toggle the display from the search bar.
- Click **“Add”**.
- Enter the **monthly interval** if any achievements are **time sensitive**. The “Time-Sensitive” box will automatically populate once an interval is entered.
- For achievements with no expiry, leave the **“Months” box empty**.
- Make sure the **Required** box is checked for those resources that are required
- Click **“Save”**.

Editing an Existing Training Plan Template

From your CMDS home page:

- Click **“Tools”** under ‘System’ on the side menu.
- Under ‘Libraries’ click **“Programs”**.
- Expand **‘Criteria’** and search for the template you would like to edit.
- Under ‘Results’ click the **name** of the template.
- To edit the achievements in the template, expand the **“Achievements”** tab.
- To edit the settings for the template, expand the **“Settings”** tab.
- Once you have made your changes, click **“Save”**.
- To duplicate the template for use in another department, click **“Duplicate”** in the **“Program”** tab.
- Select the new department you would like to add the template to.
- **Rename it**.
- You will then see a message that indicates if any of the achievements could not be copied to the new template/department. This is due to the achievements not being currently assigned to the department you have selected.
- You can continue by clicking **“Save”** and the template will be copied/created (excluding the resources identified above).

Assigning Training Plan Templates

From your CMDS home page:

- Click **“Tools”** under ‘System’ on the side menu.
- Under ‘Bulk Update’ click **“Assign Programs to Learners”**.
- Select the **“Department”** from the drop down.
- Select the **“Program”** from the drop down.
- Check/uncheck people as required.
- Select the **radio button** indicating what should happen to the user(s) existing achievements assigned to them.
 - Default option is *“Do not make any change to any existing achievement”*.
- Click **“Next”**.
- Review, then click **“Save”**.

Setting Up Email Notifications

From your CMDS home page, click **“Tools”** under ‘System’ on the side menu:

Step #1

Start with setting up the **Email Notification Subscribers** for the individuals in the department.

- Under ‘Accounts’, click **“Notification Subscribers”**.
- Select the **“Department”** using the drop down.
- **Check / uncheck** the box under ‘Employment Type’ to filter if you want department employment individuals or anyone assigned to the department to display.
- Select the type of notification you would like to set up using the drop down.
- Click **“Search”**.
- **Select the individuals** you would like to receive the notifications by **checking** the box next to their name

Repeat the above process for each notification type you would like to set up for each department. DO NOT click “Trigger”

- Click the “Home” in the top left to return to your home page.

Step #2

Next, you can choose to set up **carbon copy email notifications**.

- Under ‘Accounts’, click **“Notification Followers”**.
- Select the **“Department”** using the drop down.
- Select the type of notification you would like to set up using the drop down under **‘Notification’**.
- Select a **“Follower”** from the drop down.
 - NOTE: This is the person for whom you would like to receive the carbon copy emails.

- **Check the box** next to the user's name for which you would like the **"Follower"** selected to receive carbon copy email notifications.
 - If you are unable to check the box next to the individual's name, this means that notification subscriptions are not set up for that user for that notification.
Please refer to Step 1.

Troubleshooting a User's Password

When logging into CMDS for the first time, a user will use the default password **cmds246**. They will then be required to change their password to a password of their choice.

If a user forgets their password, they should reset it using the **"Reset my password"** link on the login page. This will require them to enter their email address (the email address currently in CMDS) and the system will email them with instructions on resetting their password.

As an administrator, you can reset a user's password, returning it to the default password of **cmds246**. To do this:

- Go to **"People"** under 'System' on the side menu.
- Search for the user and click on their name.
- On the **"Person"** tab, click **"Reset Password"**.
- Click **"OK"** on the popup to confirm the reset.
- Click **"Save"**.
- Inform the user of their reset password.
- The user will be able to login once using cmds246 and will be prompted to **change their password** to a password of their choice.
 - The temporary password has a very short expiry date. If they do not login before this password expires, you will have to reset it again to reset the "Password Expiry" date.
 - Once a user changes their password, **no admin or CMDS team member** can see what they have changed their password to.

Passwords are set to **expire yearly** for all users, one year from the date the user first changed their password. You can see a user's expiry date by:

- Going to **"People"** under 'System' on the side menu.
- Search for the user and click on their name.
- Under the **"Login"** tab you will see **"Password Expiry" and a date.**
- If you know this date will be an issue for the user, you can **modify the expiry date** prior to the password expiring.

If a user is trying to access CMDS with the wrong email address, the system will indicate that the email address being entered does not match one on file, and they will be instructed to contact us, or their local administrator. At which time anyone with admin rights in CMDS can help them determine what email address is currently in CMDS and modify it if needed.
